

EMPLOYEE ATTRITION ANALYSIS

REPORT

PROJECT GOAL

A decorative line graphic in the top left corner, consisting of a series of connected line segments that form a jagged, upward-trending arrow shape, rendered in a light blue color.

The goal of this project is to analyze IBM as a whole, understand factors driving employee attrition, and examine compensation and benefits to assess their adequacy and impact on retention .

1st Dashboard : Overview

- The Overview dashboard presents key employee statistics, including age, gender, and department distributions. It clearly distinguishes between current employees and those who have left the company.
- **Count of Employees by Department:**
Most employees work in Research&Development, while Human Resources has the fewest employees.
- **Count of Females & Males:**
The company has significantly more male employees than female employees.
- **Leave? (Yes / No):**
The majority of employees did not leave the company, indicating low attrition overall.
- **Count of Employees by Gender (Attrition):**
Male employees show higher attrition counts compared to female employees.
- **Count of JobRole by Education and Department:**
Employees with Education Level 3 dominate across departments, especially in Research & Development, while higher education levels have noticeably fewer employees.

1st Dashboard : Overview

- **Count of Age and Count of Age by Age Group:**
Most employees fall in the mid-age groups (28–37), while older age groups have significantly fewer employees.
- **Count of EmployeeNumber :**
The dataset contains a total of 1470 employees
- **Average of MonthlyIncome by JobLevel :**
Monthly income increases sharply with job level, with Job Level 5 earning the highest average salary.
- **Count of EmployeeNumber by JobSatisfaction :**
Job satisfaction levels are fairly balanced, with level 4 being the most common and level 1 the least common.

2nd Dashboard : Workplace Factors

The Workplace Factors dashboard shows how work factors affect employee attrition.

It highlights that higher pressure and lower income increase the likelihood of leaving.

Attrition Rate :

The company's attrition rate is 16.12%, indicating a moderate level of employee turnover.

Left the Company Insight :

A total of 237 employees have left the company.

In the Company

1,233 employees are currently still working at the company

%GT Count of Attrition by OverTime

Employees who work overtime have a significantly higher attrition rate compared to those who don't.

%GT Count of Attrition by BusinessTravel

Employees who travel rarely experience the highest attrition, while those who don't travel have the lowest rate.

2nd Dashboard : Workplace Factors

Sum of EmployeeCount by DistanceFromHome

Attrition is highest for employees living very close to the company, and decreases as distance increases.

Attrition, MonthlyIncome and YearsAtCompany (Scatter Plot)

Employees with lower income and fewer years at the company are more likely to leave (shown by the concentration of red points).

RelationshipSatisfaction by Job Role (Heatmap)

Job satisfaction varies significantly by role, with some roles having consistently low satisfaction levels that may contribute to higher attrition.

Department / Age Group Filters (Slicers)

These slicers allow filtering by department and age group, enabling targeted insight into specific employee segments.

3rd Dashboard : Compensation With Attrition

The Compensation with Attrition dashboard shows how salary, job level, and career growth relate to employee distribution and turnover. It highlights that limited salary growth and slow promotions may contribute to higher attrition.

Workforce Distribution Is Highly Concentrated in R&D

The majority of employees (961) work in Research & Development, showing that the company's talent structure is heavily oriented toward technical roles.

Income Levels Are Driven by Department Size and Job Levels

R&D not only has the largest workforce but also contributes the highest monthly income totals, while most employees fall into lower job and stock-option levels.

Career Progression Is Slow for Most Employees

Most employees have stayed many years in the same role and haven't been promoted recently, indicating limited upward mobility inside the organization.

Salary Growth Is Limited

The average salary increase is modest, showing slow financial progression

THANK YOU!
